WHO WE ARE?

Fritzomart, your trusted partner in the realm of Information Technology. As a leading provider of IT solutions, we specialize in delivering innovative solutions tailored to meet the evolving needs of our Business Partners across various industries.

At Fritzomart, we are driven by a passion for technology and commitment to delivering excellence. Our team of skilled professionals combines expertise with creativity to provide cutting-edge solutions through AI (Artificial Intelligence) that empower our Business Partners to thrive in this era of digital world.
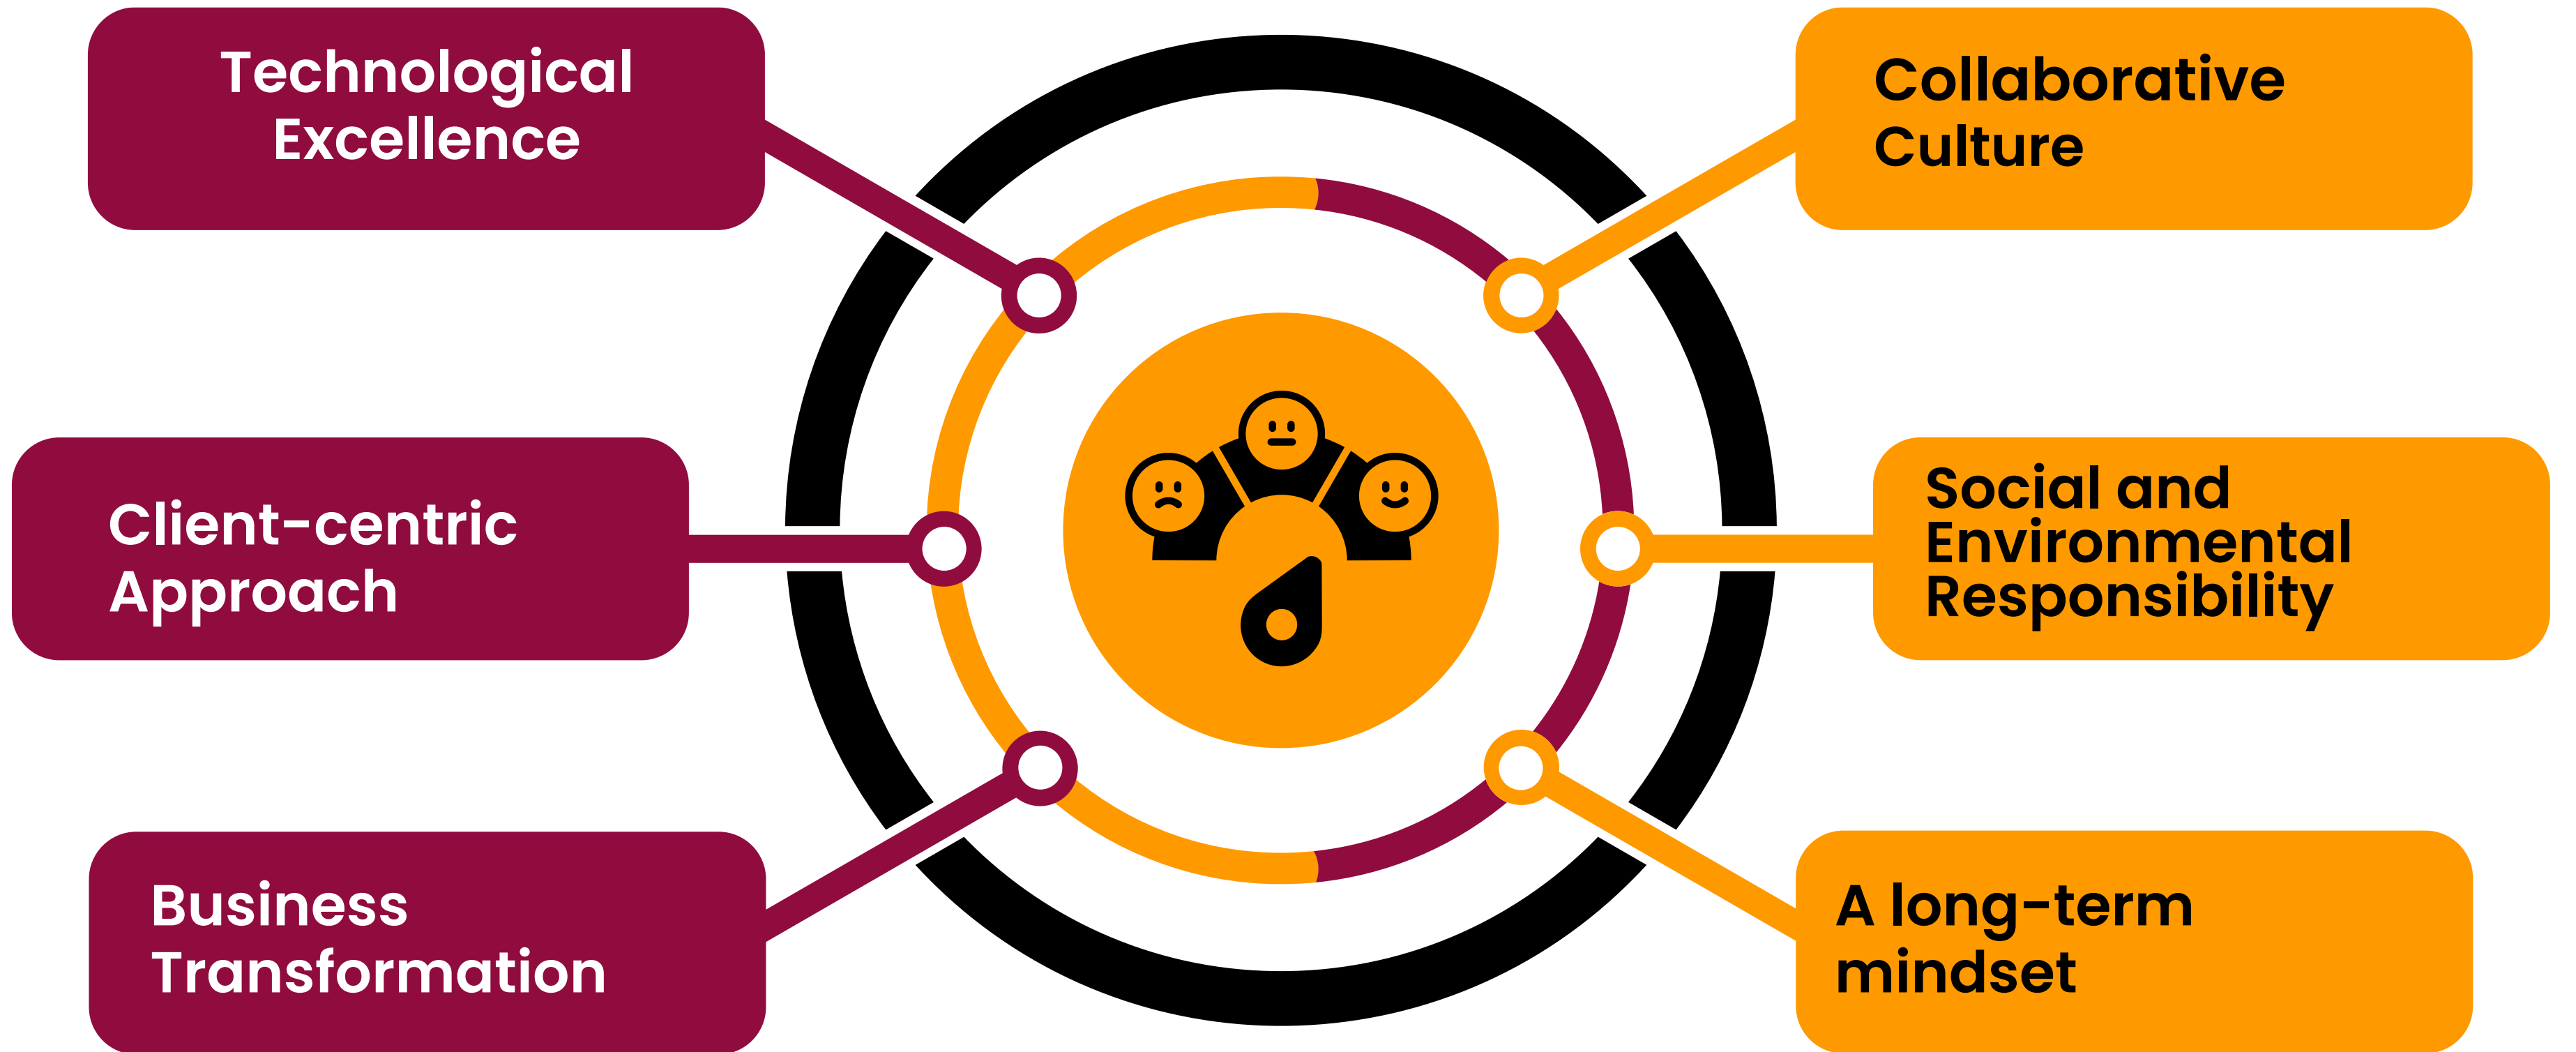

Vision And Mission

Our Vision

At Fritzomart, our vision is to revolutionize the way businesses operate in the digital world. We strive to be at the forefront of technological innovation, empowering organizations to achieve their full potential and create a meaningful impact in their respective industries. Our vision encompasses a future where technology seamlessly integrates with businesses, enabling them to adapt, grow, and thrive in an ever-evolving digital landscape.

Our Mission

Our mission is to deliver cutting-edge IT solutions that drive business transformation and maximize our clients' success. We are committed to providing exceptional services, tailored to meet the unique needs and challenges of each organization we work with. Through our expertise, innovation, and collaborative approach, we aim to become the trusted partner for our Business Partners, helping them harness the power of technology to achieve their strategic objectives.

Key Elements of Our Vision and Mission

Technological Excellence

Client-centric Approach

Business Transformation

Collaborative Culture

Social and Environmental Responsibility

A long-term mindset

Creating Better IT Solutions!

Team-Cam

At Fritzomart, we are driven by a passion for technology and a commitment to excellence. Our team of skilled professionals combines expertise with creativity to provide cutting-edge solutions through AI (Artificial Intelligence) that empower our clients to thrive in this era of digital world.

With years of industry experience and a decade long research and development, we have developed our In-house AI (Artificial Intelligence) based software called Team-Cam.

We gather visual data from client's DVR and transform it into presentable text information. As in any business, information is the key and video analytics can generate large amount of information gathered from video data. With the help of Smart Data Extracting Software from DVR, we can capture and convert every data that a CCTV Camera watches into Excel format, Screen shots and short video clips.

Creating Better IT Solutions!

How It Works?

Team-Cam extracts SOP violations in the form of visual data from client's DVR and transforms it into presentable information.

As in any business, information is the key and video analytics can generate large amount of information gathered from video data. With the help of AI Smart Data Extracting Software, we can capture and convert every data that a CCTV Camera watches into Excel format, Screen shots and short video clips.
